

WILD DAYS

PROJECT SEAGRASS

MAKE A SEAGRASS MEADOW!

GATHER

ANYTHING THAT CAN BE USED TO MAKE YOUR CREATURES: JUNK, LEAVES, TWIGS, MAYBE SOME FEATHERS

CREATE

CREATURES THAT LIVE IN SEAGRASS! HOW ABOUT A LOO ROLL ANEMONE? STONE JELLY FISH? OR MILK BOTTLE COD?

BUILD

YOUR SEAGRASS SCENE IN A PATCH OF LONG 'SEA' GRASS. USE TREES OR NEARBY STRUCTURES TO DANGLE CREATURES THAT ARE SWIMMING OVER YOUR SEAGRASS MEADOW

TOP TIPS

- Use a handy adult when cutting and sticking!
- Paints, tissue paper and magazine pictures are a great way to add colour!
- A yoghurt pot with string dangling might be a **jelly fish**!
- Buttons, bottle tops and small stones or shells make great eyes.
- Long sticks might be legs or a **pipefish** body!
- Clothes pegs make snappy **lobster / crab** claws.
- Wine bottle corks are great to stick things in!
- How about **feathers** for fins?
- Twigs and sticks can be spiked into the ground to help your animals swim above the meadow.

NOW TRY:

Flat fish, seahorse, cod, turtle, shark, snails, shrimp, pipefish, anemone, cuttlefish, manatee, crab, lobster, octopus, parrotfish, barracuda and so many more!

NOTICE HOW THE GRASS MAKES THE PERFECT HIDING SPACES FOR YOUR CREATURES!

Seagrass does the same, helping animals to hide from predators.
