

WILD DAYS

PROJECT SEAGRASS

CLIMATE CAMPAIGNER

GET COSY

IMAGINE YOU'RE THE EARTH AND GRAB SOMEONE TO BE YOUR SUN. THE SUN PILES BLANKETS, WOOLY HATS AND GLOVES ON TOP OF THE EARTH. HOW DOES THE EARTH FEEL WITH ONE BLANKET? HOW ABOUT WITH FIVE?

GET TOO COSY

MORE BLANKETS HAS THE SAME EFFECT AS MORE GREENHOUSE GASES (LIKE CARBON DIOXIDE) BEING ADDED TO THE ATMOSPHERE AND TRAPPING IN THE SUN'S RAYS. TOO MUCH GREENHOUSE GAS, LIKEWISE TO TOO MANY BLANKETS, TRAPS TOO MUCH WARMTH AND THE EARTH BECOMES UNBEARABLY HOT- THIS IS CLIMATE CHANGE.

SAVE THE WORLD

TIME TO GET CRAFTY. MAKE A POSTER WITH AS MANY TIPS TO FIGHT CLIMATE CHANGE AS YOU CAN. MAKE SURE IT'S EYE CATCHING WITH LOTS OF COLOUR AND PICTURES!

CLIMATE WARRIOR IDEAS

- Help **plant** a **seagrass** meadow! Can you remember from the video how many times faster seagrass is at storing carbon dioxide than a rainforest?
- **Walk or cycle** to school or to the park!
- Have a regular **blackout** night- lights and screens like TVs use lots of energy. Instead you could tell scary stories by torch light!
- **Reduce, reuse** and **recycle**- making brand new things takes lots of energy!
- Use the **Seagrass Spotter** app to help scientist protect our seagrass meadows.
- Write letters to grown ups about climate change- how about your class mates or even the **prime minister**?!
- Keep doors closed- the energy used on heating or air con is wasted with it open. Ask shopkeepers if they'll think about shutting theirs.

NOTICE HOW ONE BLANKET KEEPS YOU AT A COMFY TEMPERATURE

The earth is the same, it needs some of those gases in the atmosphere to keep enough of the sun rays trapped in warming us- just not too many!
